# Nasal Cannula

The nasal cannula delivers supplemental oxygen to the patients. It provides support for individuals experiencing difficulty breathing.

Made from DEHP-free PVC, the cannula is soft and flexible, ensuring maximum comfort for the patient. The device features a lightweight tube that rests around the ears and delivers oxygen through two anatomically curved prongs inserted into the nostrils.

### Soft tubing

Flexible and gentle on the ears and face, minimizing friction and pressure.

### Soft prongs

Anatomically curved, soft nasal prongs improve patient comfort.

### Adjustable slider

Secure and comfortable fitting.

PN	Prong Size	Patient	Pcs/Carton
H04609001	L	Adult	100
H04609002	M	Pediatric	100
H04609003	S	Neonate	100
